**Note:** The hardware pack may contain more items than required. Please contact our sales team if you have any questions/concerns.

## Bed Frame Parts:

Please note, your bed head may look different to this image, however the following instructions will still apply

**Slat System:** See the attached document "Amendment to instructions for all SilverLynx beds".

**Not Provided:** Phillips head screwdriver

**STEP 1** – Position Bed Head and Side Rails approximately where your bed is to be set up. Connect the Side Rails to the Bed Head by hooking the Side Rail brackets onto the Head brackets.

**STEP 2** – Screw three button head bolts (M6) into the position shown to connect the Side Rails to the Bed Head and tighten (finger tight only).

*Having trouble? See \*Helpful Tips\* at the end of this document.*

**STEP 3** – Complete the above process on the other Side Rail, then repeat with the Foot Panel.

*Having trouble? See \*Helpful Tips\* at the end of this document.*

**STEP 4** – Ensure that the bed is sitting square and then tighten all button head bolts using the allen key. Once snug, tighten only with ¼ turn of the Allen Key. DO NOT USE powered drills as over-tightening can cause foot end rail to bow. Your bed should now look like the following diagram.

**STEP 5** – To set up the slat and spine system, proceed to the instructions titled "Amendment to instructions for all SilverLynx beds". Note the 2x 38mm screws provided in the hardware pack can be used in this section of the assembly.

### **\*Helpful Tips\***

#### **STEP 2 & 3**

The button head bolts that connect the Siderails to the Bed Head & Foot can sometimes be tricky to align. If you are having trouble, try supporting the bottom edge of the Siderail near the bracket and lift it up while you connect the bolts. This can help line up the holes in both brackets so that the bolt can connect easily.

#### **GENERAL**

Make sure not to tighten bolts before attaching all components and making sure they sit square. Once you are ready, make sure all bolts are snug, then tighten **only** with ¼ turn of the Allen Key. **DO NOT USE** powered drills as over-tightening can cause components to bow.

Never force bolts if you can feel resistance as this can cause the thread to strip. Try to adjust the hole alignment until your bolt can connect easily by hand.

### **NOTES**

- Button head bolts should be regularly inspected and may need to be retightened periodically
- **Never drag or move assembled bed as this may damage the bed**

### **CARE & MAINTENANCE**

Your SilverLynx product is crafted with care, properly maintained, it will mature over time developing a rich deep patina enhancing its appearance. To get the best performance from your SilverLynx product, please follow the simple care instructions listed below.

- Do not use silicone based polishes/cleaners at any time.
- Dust surfaces gently with a feather duster then wipe gently with a slightly damp cloth/chamois.
- Do not allow liquids, damp clothes to remain in contact with lacquered surface for extended periods.
- Never place furniture in close proximity to heating outlets.
- Exposure to direct sunlight will cause colour fading to fabrics, leathers and timber finishes.
- Do not allow solvents, abrasives or heated objects to come in contact with the product.
- Do not use cordless drivers or power drills to tighten any bolts, as over-tightening can cause components to bow, and can cause damage to the bolts.

### **CARE & MAINTENANCE – QUARTZ STONE TOP**

To get the best performance from your Quartz Stone Top, please follow the simple care instructions listed below.

- For everyday cleaning, use warm soapy water (a pH neutral/ or a mild liquid detergent) and a damp cloth
- Avoid prolonged rubbing in one spot when cleaning
- Polishing/waxing surface is not recommended due to the non-porous nature of material which will retain its glossy finish
- Quartz stone is a non-porous material with good stain resistance, however we advise you do not allow liquids or wet food to have prolonged contact with the stone top. Wipe up any spills as soon as they occur
- Do not use bleach or cleaning products with high alkaline/pH levels on or near your Quartz stone product.
- Quartz stone is resistant to *moderate* temperature, however we advise you do not place hot cookware directly onto the stone as this can cause damage/discoloration. Use a trivet or other protective object for hot items
- For indoor use only
- Exposure to direct sunlight will cause discolouration
